California's 75 Percent Initiative: Defining the Future

The Legislature and Governor Brown set an ambitious goal of 75 percent recycling, composting or source reduction of solid waste by 2020. Instead of focusing primarily on local diversion, the law calls for the state and the Department of Resources Recycling and Recovery (CalRecycle) to take a statewide approach to decreasing California's reliance on landfills. CalRecycle has been tasked by the Legislature to examine how extensions of existing efforts, as well as new strategies, can be combined to reach that policy goal. www.calrecycle.ca.gov.

Iniciativa de 75% para California: Definición del Futuro

La Legislatura y el gobernador Brown fijaron un ambicioso objetivo de reciclar, compostaje o la reducción en la fuente de los residuos sólidos por 75% en el año 2020. En lugar de centrarse principalmente en la desviación local, la ley exige que el Estado de California y el Departamento de "Resources Recycling and Recovery" o "CalRecycle" adopten su enfoque a nivel estatal para reducir la dependencia que tiene California en los vertederos. "CalRecycle" ha sido encargado por el Poder Legislativo para examinar cómo las extensiones de los esfuerzos existentes, así como nuevas estrategias, se pueden combinar para alcanzar este objeto político.
