

BASURA DE CONSTRUCCION Y DEMOLICION

Opciones de Reciclaje

Sobre los ultimos dos años, el Condado Kern ha sido enfrentado por un aumento de **100 por ciento** en la cantidad de **basura y desperdicios producida por actividades de construccion o demolicion**. Tambien se ha visto un aumento de materiales de construccion y demolicion tirados ilegalment. La mayoría de estos materiales pueden ser **reusados o reciclados** de manera que los recursos naturales sean extendidos, manteniendo la comunidad limpia y tambien **ahorrandole dinero** en el proceso.

Materiales de construccion o demolicion incluyen **madera, metal, concreto, ladrillo, plastico, piedras, tierra, carton, tuberia, y otros materiales** producidos por tal actividades. De estos materiales, el metal se recicla mas frecuente mas la madera compone la mayoría de los desperdicios que se tiran en el basurero municipal.

El costo de tirar basura producida por actividades de construccion o demolicion, representa una porcion significativa de los gastos de funcionamiento ademas de consumir espacio valioso en el basurero municipal. Por medio de planar diligentemente, el **reuso y recilaje** de estos materiales puede ser **mas economico** que tirarlos.

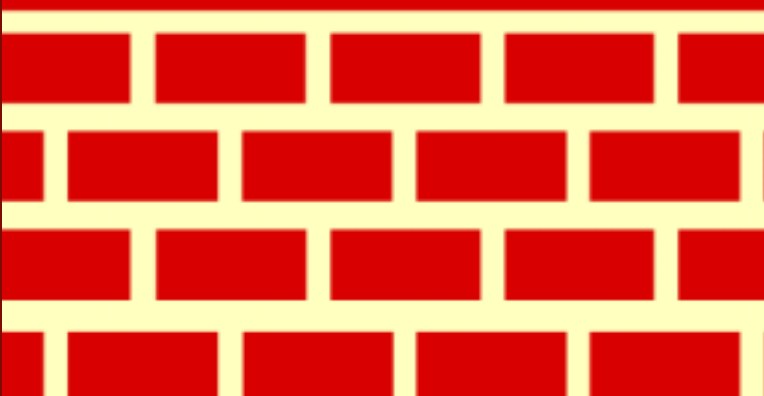

Este folleto le ofrece informacion referente a las opciones que podran ahorrarrle el costo del basurero municipal y quisas tambien por medio de las ventas de **materiales** que se han **reciclado**, pueda **ganar** un poco de **ingresos**.

Para mas informacion, comuniquese con el Departamento de Administracion de Basura del Condado Kern al (661)862-8900 o (800)552-KERN, opcion 6

Construction & Demolition Waste RECYCLING OPTIONS

Recycle & \$ave

Over the last two years, Kern County has experienced a **100 percent increase** in the amount of **Construction and Demolition Waste (C&D)** being disposed at local landfills. Also, increased amounts of illegal dumping of C&D waste is occurring Countywide. Many of these materials can be **reused or recycled**, thus prolonging our supply of natural resources, keeping our community beautiful and potentially **saving you money** in the process.

Common C&D materials include **lumber, drywall, metals, masonry (brick, concrete, etc.), plastic, pipe, rocks, dirt, cardboard, or green waste** related to land development. Of these, metals are the most commonly recycled material while lumber makes up the majority of debris that still goes to a landfill.

The disposal of wastes generated from construction and demolition activities represent a significant portion of operating expenses in addition to consuming valuable landfill space. Through careful planning, **reuse and recycling** of C&D materials can actually be **more economical** than disposal.

This publication provides information on local **C&D alternatives** to disposal that will **save you money** in avoided disposal fees and potentially **generate income** from the sales of salvageable materials. For specific information on costs and other waste acceptance criteria or requirements, please contact the business as noted.

For more information regarding C&D recycling and disposal, please contact the Kern County Waste Management Department at (661) 862-8900 or (800) 552-KERN, option 6.

ALUMINUM & DEMOLITION SCRAP METAL
